SUMMARY

Results-driven Computer Science graduate with expertise in AI, cloud computing, and cybersecurity. Currently completing a cybersecurity certification, building advanced knowledge of threat detection, risk assessment, and secure systems design. Experienced in delivering AI-powered solutions and digital transformation projects, with a strong ability to bridge business and technology needs in client-facing environments.

PROFESSIONAL EXPERIENCE

Director - Custom AI **Dec 2023 - Aug 2024**

- Designed and deployed AI-powered virtual assistants for businesses, improving customer service efficiency and engagement.
- Applied Agile methodologies to deliver tailored client solutions with continuous iteration and feedback.
- Conducted security and functionality testing for AI-driven applications, ensuring compliance with data protection standards.
- Built and maintained strong client relationships, offering technical recommendations aligned with business strategy.

IT Support Technician - Flamming Patties **Jun 2023 - Sep 2025**

- Provided first-line technical support via phone, email, and remote tools, assisting users with hardware, software, networking, and peripheral issues.
- Diagnosed, logged, and tracked incidents efficiently, maintaining a high first-time fix rate and ensuring minimal downtime for users
- Preformed basic network troubleshooting, including VPN configuration, connectivity fixes and access troubleshooting.
- Strong knowledge of windows 10/11, Microsoft 365, active directory, and remote support tools.
- Skilled in troubleshooting PC hardware, software, printers, peripherals, and basic network/VPN issues.
- Highly organised and able to work independently, managing priorities effectively in environment.

KEY SKILLS

- **Consulting & Business Skills**: Client engagement, stakeholder management, Agile project delivery, solution design
- **Cybersecurity Skills**: Vulnerability assessment, penetration testing (Wireshark, Nmap, Kali Linux), IoT security, risk management, cybersecurity frameworks
- **Technical Skills**: Python, MySQL, Virtual Machines, Cisco Packet Tracer, AI chatbot development
- **Tools & Platforms Skills**: Microsoft Office Suite, CMS, GitHub, Jira, Trello, Slack
- **Core Strengths**: Leadership, communication, adaptability, technical presentations

EDUCATION

BSC COMPUTER SCIENCE — **Sep 2021 - Jun 2024**
Coventry University, Uk
Double Diploma in Information Technology (BTEC) — **Sep 2019 - Jun 2021**
UCT Swindon, UK

PROJECTS & ACHIEVEMENTS

- Cybersecurity Audit: Performed penetration testing on IoT devices (TP-Link smart bulb) using Wireshark & Nmap; identified vulnerabilities and proposed mitigations.
- Cloud & Network Security: Configured secure environments with Kali Linux and Cisco Packet Tracer in enterprise simulations.
- AI Chatbot Development: Built and deployed custom intelligent chatbots for clients, integrating secure design principle.

CERTIFICATIONS

- ITCERTIFY CompTIA IT Fundamentals+
- CompTIA A+ (Core 1: 220-1101, Core 2: 220-1202| Expected Jan 2025)
- ITCERTIFY CompTIA Network+ (N10-008)
- ITCERTIFY CompTIA Cloud+ (2020)

REFERNCES

Dianabasi Nkantah
- Head of department in Computer Science at Coventry University
